Nov. 11	10:30am	Ontario Energy Board Presentation

Ontario Energy Board

Did you know that your utility can't change its natural gas or electricity rates without approval from the Ontario Energy Board? And, when your utility files a rate application, you can have a say by:

- Sharing your comments using our [Letter of Comment form](#)
- Attending an OEB-hosted [community meeting](#) to learn about what your electricity utility is asking for
- Contacting [groups that regularly participate](#) in rate hearings and that may represent your interests

When you talk, we listen. So get involved. Find out how at oeb.ca/participate

Canadian Young Speakers for Agriculture

Canadian Young Speakers for Agriculture Inc. (CYSA) delivers an annual, bilingual youth competition at the Royal Agriculture Winter Fair as part of Youth Weekend. This national competition provides youth an opportunity to develop public speaking and communication skills by expressing their opinions and ideas on current topics related to agriculture and agri-food. The competition originated in 1985 in honour of International Youth Year and was originally sponsored by the Ontario Ministry of Agriculture and Food.

Trent University High School Seminars

Register your class for a lively 30-minute seminar with Trent University professors and researchers about cool topics in science! Help your students discovery pathways and career opportunities in the agriculture, food and environmental science fields. Pre-registration required, please visit the Teachers page for more information.
