

Life Cycles and Food Chains

Did you know that a hen lays approximately 300 eggs each year?
In the eggs below, describe each stage of a chicken's life.

Farms provide us with a variety of foods. Animals eat from crops and then their manure is used to fertilize soil for more plant growth. Draw a food chain below and include: The Sun, Corn, Dairy Cattle, Beef Cattle, Tomatoes, Chickens, Eggs and 3 of your favourite foods!
